Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cetrone (3,171,409). Cetrone shows a strap capable of being used as a poll strap 11 comprising an outer sheath 14 and a non-elastic cable 28 creating a protrusion along the length of the poll strap to apply pressure against the poll. With respect to claims 17 and 18, to completely encase the cable in the outer covering would have been obvious to one skilled in the art in order to prevent chafing or to reduce wear on the cable during use. With respect to claim 21, to replace the filler 28 of Cetrone with a flexible steel cable would have been obvious to one skilled in the art as a replacement of functional equivalents.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cetrone in view of Ray (2,932,930). Cetrone does not teach being used with a horse control device. Ray shows a horse control device/halter having a poll strap 10. With respect to claim 20, to replace the strap of Ray with the strap of Cetrone would have been obvious to one skilled in the art as a replacement of functional equivalents.

Allowable Subject Matter

Claims 1-17 and 22-31 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Hartwig (526,706), Spohr (544,777), Henry (3,273,311), Muratore (5,174,097), Rodgers (2004/0065061) and Dually Halter (www.goodwoods.com.au/prod1023.htm).
